

MEETING MINUTES

Land Bank Commission Meeting June 18, 2021 Virtual ZOOM Meeting

Commission Members in Attendance:

Jim Skoog, District 1, position 1 Sandi Friel, District 2, position 2 Brian Wiese, at large, position 4

Doug Strandberg, at large, position 5 David Meiland, at large, position 6 Christa Campbell, at large, position 7

Commission Members Absent: Miles Becker, District 3, position 3

Land Bank Staff in Attendance: Shauna Barrows, Charlie Behnke, Lincoln Bormann, Judy Cumming, Peter Guillozet, Doug McCutchen, Aaron Rock, Kayla Seaforth, Jacob Wagner, Amanda Wedow, Tanja Williamson

Land Bank Staff Absent: Eliza Habegger, Erin Halcomb

County Council Liaison: Christine Minney

County Manager: Absent

Public in Attendance: 10 individuals over the course of the meeting.

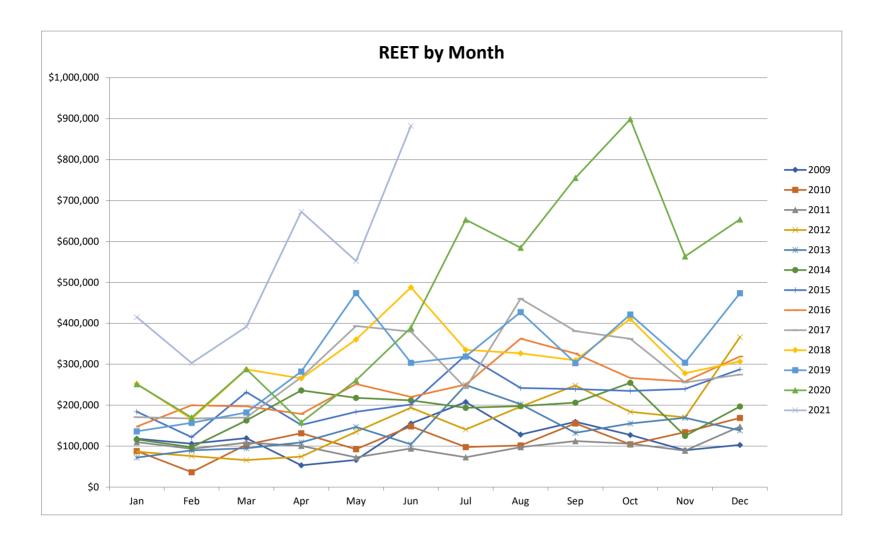

Торіс	Key Discussion Points & Agreements
Call to Order 8:32 am	Sandi Friel, chair, called the meeting to order.
Public Comment 8:32 am	Megan Crandell thanked the Lincoln for his guidance in the "Top of the World" acquisition. Although the Lopez community was able to raise the funds in the short window of time, the seller was unwilling to sell. Megan noted that it was great to see the public galvanized.
Adoption of Minutes 8:35 am	The draft May 21, 2021 minutes were reviewed. There were corrections. Minutes were approved with corrections.

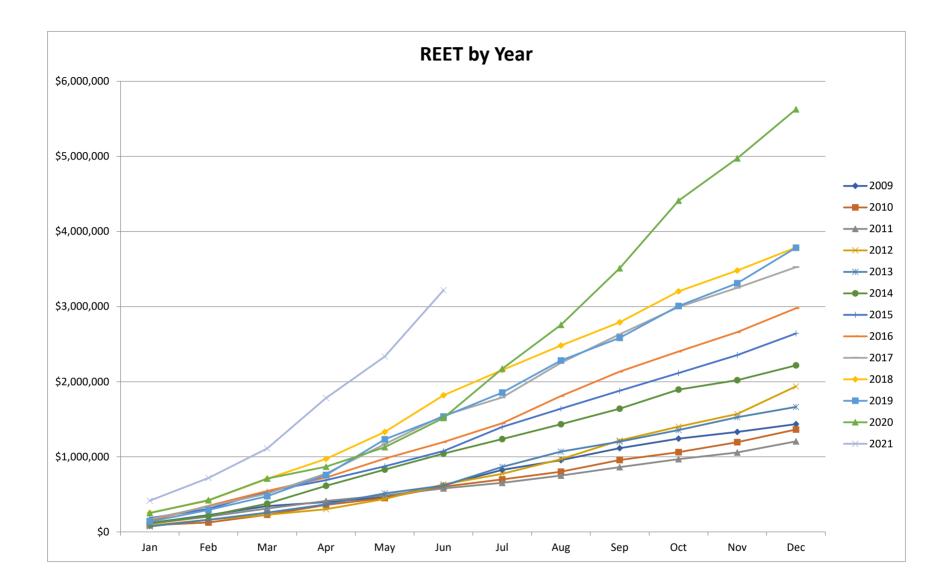

Chair and Commissioner's Report 8:37 am	Nothing new to report.
Finance 8:38 am	May Real Estate Excise Tax (REET) was \$552k with 58 sales, and as of June 15, \$454k for the month. Aaron referenced the budget calendar and noted the addition of Commission meetings, but he is waiting for more information from the auditor's office. He'll share with the Commission once it's updated. Jim queried Sandi about the current real estate market. Sandi said inventory is increasing with buyers waiting in the wings. Sandi thanked Aaron for the budget timeline and noted it was helpful.
Council Liaison 8:53 am	Christine Minney reported the auditor's office financial review revealed that the County is in better financial shape than was expected even with the impact of Covid on tax revenue. She said Milene Henley reported the County ended 2020 quite strong, and 2021 is looking stronger than 2019 (pre-Covid) and the County will receive approximately \$1.7M in Covid relief funding.
	Christine had an update from the Ferry Advisory Committee (FAC) stating it's not just San Juan County that is feeling the effects of downed/late ferries; it's a system wide issue. Currently WA State Ferries is running a 19-vessel system with only one back up vessel available for the entire system.
	Christine encouraged everyone to check out the new mural at the Orcas ferry landing. She also highlighted the groundbreaking ceremony for the Public Works Operations Center on Beaverton Valley Rd. The project has been 31 years in the making.
	Lastly, Christine shared that County Administrator, Mike Thomas, will be leaving his position at the end of the year to take over for Duncan Wilson, who is retiring as Town of Friday Harbor Administrator.
Director's Report 8:55 am	Top of the World – Background : This six-parcel plat is just south of Lopez Village and features views across the archipelago, with driving access to the top. Its acquisition would also create the potential for trail connections in multiple directions.
Lopez Island	The property had been marketed for some time and seen multiple offers come and go, and three parcels were under contract. A group of community members, in an effort to preserve most of the plat and create public access, took pledges, and was working with the seller's agent and potential buyers. Current: Lincoln reiterated what Megan had said – the community had the money lined-up, but the seller decided to retain three lots. Lincoln thanked Megan for her efforts.
Stewardship Report	Sandi asked Doug M. about the Westside incident that was included in the
8:58 am San Juan Island	Stewardship Report. Doug responded that yes, he had spoken with the Sherriff and will provide a small, laminated map of the SJI preserves and relevant enforcement codes. The Sherriff will distribute to deputies to have on hand as a reference. Doug
	also offered to visit the Sherriff's Office and answer questions. Sandi asked if there
San Juan Island continued	 was any update regarding water rights and irrigation at Zylstra Lake Preserve. Lincoln replied that the property came with two water rights, but because the Land Bank only purchased a portion of the Tomas estate and neighbors purchased other portions there is confusion. The Land Bank is allowing previous use until the legal

	situation is clarified. Sandi asked if the limiting downstream flow is detrimental to the False Bay watershed. Lincoln responded affirmatively and noted farming effects water quality quantity. The Land Bank is working with Clean Water Utility and the Conservation District for solutions.					
	David asked if the removal of stop logs from the dam was an issue. Lincoln said the log removal was recommended by the State Dam Safety Office. This summer will be somewhat of an experiment with no logs and less water. Staff will evaluate later this year and go from there.					
Preserve Naming Policy	Background: As a result of discussion in the Justice, Equity, Diversity, Inclusion (JEDI) committee, a new policy for naming preserves was created and presented to the Commission for approval. The draft policy was well received, and the Commission asked that the proposed policy come back for another look after being revised with suggested edits. Current: The Commission liked the revised policy. Sandi asked about the usage of the term Native American. Erin noted that "Indigenous Peoples" was more appropriate.					
	ACTION: Erin will update policy using phrase Indigenous Peoples.					
	Brian noted that demonstrating effort to engage the Tribes in naming preserves may might prove difficult. There was discussion.					
	ACTION: Christa Campbell moved to accept the Preserve Naming Policy. Doug Strandberg seconded the motion. There was no further discussion. Motion passed unanimously.					
Outreach/Volunteer Report 9:50 am	Tanja announced Sound Publishing's annual visitor's guide and Coldwell Banker's summer showcase are now out, both of which have contributions from the Land Bank. There are noxious weed removal volunteer work parties scheduled for June on SJI. And the Land Bank is collaborating with a Spring Street International Student on a school project during the month of July – a innovative and interactive new way to poll the community using artificial intelligence software to aid analysis.					
Break						
9:35 am – 9:45 am						
Coffelt Farm Preserve Update	Sandi will lead the interview with the current lessee; she asked for helpers. The interview will take place via Zoom and will be recorded. The recording will be included in the July LBC meeting materials.					
	Peter said about a month ago he found an appraiser, Fred Strickland, who appraises ag property. Peter is still refining the scope with a goal of having a report to the Commission in September but will depend upon when the County contract with Strickland is finalized.					
Coffelt Farm Preserve Update continued	Doug S. has been reviewing Coffelt Farm's history (including the Coffelt Farm Stewards) and would like the appraiser to also provide a market value price. Doug noted the Commission has not made a decision regarding the six different recommendations CART provided in their report. Sandi agreed with Doug's suggestion and noted that while in the information gathering mode, a rough estimate would be good to have. Lincoln noted that the whole analysis could run around \$20k.					

	The Commission felt the information is important and worth the cost. David would like to discuss the Commission's overall ag goals. Christa noted this topic keeps coming up and thinks it best to wait until <u>all</u> information gathering has happened. She suggested a meeting with ag as the only topic. For now, she asked if there is consensus to follow the general provided timeline for Coffelt? There was consensus.
Executive Session 10:29 am – 11:10 am	The Land Bank Commission met in executive session in accordance with RCW 42.30.110 (1)(b) to consider the selection of a site or the acquisition of real estate by lease or purchase when public knowledge regarding such consideration would cause a likelihood of increased price.
Future Agenda Items 11:16 am	Lock down Coffelt questions In-person and/or hybrid meetings discussion
Meeting Adjourned 11:19 am	Chair, Sandi Friel, adjourned the meeting.
NEXT MEETING	The next LBC meeting is scheduled to take place July 16, 2021.

STEWARDSHIP & OUTREACH REPORT JULY

OVERVIEW

Public preserves are bustling with recreational users and volunteer stewards (Photos 1-3). This past month, Land Bank staff supported multiple volunteer work parties across the districts, and volunteers helped to pull weeds, collect native seeds and pick-up of fireworks debris. Kayla hosted several seed collection events but went out solo too. She's been gathering California oatgrass, camas and cow parsnip which will be grown for restoration work as well as native plant sales. Other field activities this month that have consumed considered field time include mowing, weed whacking, trail maintenance, and trash pick-up.

The Conservation District's Youth Conservation Corps has started up for another season, and they've already been out to several preserves. The specialty license plate, which supports both the YCC and the Coast Salish Youth Corps, has generated enough money for the Madrona Institute to provide two separate \$5,000 grants this fall. The applications are located <u>here</u>.

The JEDI committee continues to work on Spanish translations of driving directions to preserves as well as relationship building within the Latinx community. The committee also organized its first training with Wayne Hare from the <u>Civil Conversations Project</u>, and he will guide a group discussion about dominant social narratives on the afternoon of July 21st.

The first in-person staff meeting in over a year was held outside of the office in Driggs Park. Discussion topics entailed deploying trail counters to quantify visitor use at several preserves, removing Covid signs at trailheads, and creating an internal working group to develop a policy for agricultural use of preserves. The Ag policy committee currently consists of Charlie, Doug, Jacob, Peter and Lincoln.

OUTREACH

Staff: Tanja Williamson

Tanja continues to work with the SJI Trails Committee on their Adopt-a-Trail initiative, and to support Michael Noonan with acquiring footage for the film. Most recently, she helped to organize family use of trails. The annual report is off to the printers and it's expected to arrive in mailboxes within the next few weeks. The internship collaboration with Spring Street International Student, Kaj Litch, launched at the beginning of July, and Tanja and team worked to develop seed statements, draft a press release, and share the survey link with partner organizations, online media, and the Land Bank email list. The link (https://sjclandbank.org/polis-community-discussion/) is also pinned to the top of the Land Bank facebook page and on the website. Please share! Kaj's goal is to have 500 respondents. At the communication subcommittee meeting, held on July 6, the tally was up to 150. This past survey for green crab came up with all three of the large Cancrid species captured in one trap and the team at Third Lagoon was given the Cancrid Trifecta award. This rare occurrence – its only happened one other time, in La Conner – was celebrated in a WSU tweet. Crab team members were particularly impressed by the long, purplish walking legs of the Graceful crab (Photo 4). Lastly, the Land Bank will host a summer intern. Skyler Reynolds is an environmental studies student from Skagit Valley Community College. He is interested in learning more about the Land Bank, conservation easements and the restoration of natural lands, and we're excited to have his sweat equity and develop an interisland, educational experience.

SALISH SEEDS NURSERY

Staff: Eliza Habegger, Margo Thorp

Thanks to shade cloth and frequent watering, our thousands of native plant seedlings all survived the heat wave. Now we've started potting up some of those seedlings into larger containers for the fall wildflower sale. And, as mentioned, seed harvest is in full swing. Orcas CCC member Shawn Beach is spending 2 days a week on Salish Seeds activities as an intern, which is really boosting our collection of hard-to-find seeds from the wild. Site prep for the nursery shed is complete, the foundation has been poured, and we anticipate that construction will begin soon.

DISTRICT 1

Staff: Doug McCutchen, Charlie Behnke, Jacob Wagner, Shauna Barrows

Beaverton Marsh: Project Manager, Dona Wuthnow, has drafted an interlocal agreement (to be shared with Island Rec) for trailhead access at Linde. Staff is considering hiring a contractor to help clean-up the old homesite on the trailhead parcel, and a minor encroachment from the adjacent property was encountered while in progress and rehabilitated willingly. A geotech engineering consultant has already started reviewing soil suitability for the future boardwalk, a cultural resource assessment will begin next week, and a wetland delineation is expected to begin in August (Photo 5). Charlie assisted WSU Extension with the annual data collection for their pasture trials.

Cady Mountain: Staff brushed an interim trail route on the new parcel. Shauna is arranging a special WCC crew, consisting of crew leaders, to travel to the islands and perform oak restoration work. Regional director Vanessa Young and others will tour the site next week. Jacob continues to decommission the old cabin and its related infrastructure. Volunteer Lars Sjoholm has helped with weed control.

Deadman Bay: Warm weather prompted reports of kids, dogs, and adults running amuck in mild chaos, but loving the access to cold water and the natural area.

Drigg's Park: The ornamental box elder in the front of office is interwoven with the utility lines and recently made some popping and cracking sounds. An arborist first recommended line clearance to be completed by OPALCO and cautioned that the tree may be structurally unsound. and unable to be "saved" with conventional methods. OPALCO prefers tree removal and willing to provide that service. If the tree is removed, it will be replaced with a native species this fall.

False Bay Creek: Charlie, Shauna, and Jacob pulled majority of the tansy throughout the property. The livestock watering system is currently down due to a solar motor failure. Charlie has ordered replacement parts and will work with Lessee John Wilson to restore water flow. In the interim, the lessee is hauling water to the site.

Frazer Homestead: Charlie, Shauna, and Jacob pulled majority of the tansy throughout the property (Photo 6). Trails are being brushed and mowed.

Kellett Bluff: Doug led a trip out to the site with Shauna, Jacob and Amanda, Cassy Shaffer (BLM) and Kathleen Foley (SJPT) and Michael Noonan. They pulled noxious weeds, monitored the Trust's CE, and did a bit of Garry oak restoration work. Doug also helped orient Cassy to BLM properties along the route (Photo 7).

King Sisters: When an electric fence threw sparks late at night, dispatch called Jim Skoog. Jim then contacted Doug. This incident highlighted the communication issues with emergency services, and Doug has followed-up with dispatch. Doug also plans to attend trainings with the Sheriff department staff. Charlie and lessee Rob Waldron identified and remedied problem.

Mount Grant: Volunteers pulled weeds and one even donated a large, custom fabricated bench (Photo 8). Logistics for the LSR grant project continues, and Doug led a discussion on land and water conservation for the Salish Sea Science's "Ecology and Conservation" summer camp.

Zylstra Lake: Volunteers pulled weeds and one is also maintaining the parking lot restoration plantings. Siphon fabrication and installation is scheduled July 15-22. Jacob is coordinating the placement of portable restroom, and the remains of small (4'x6'), roadside grass fire was observed. Farm lessee, Adam Greene, will soon begin mulch-cutting the unharvested fields, and the YCC is scheduled to begin trail work on July 12th. Another report was received that the breeding bald eagles exhibited protected behavior. Their eaglet remains in the nest but is nearing fledging. According to the USFWS, even after fledgling young birds usually remain near the vicinity of the nest for several weeks because they are dependent on their parents for food. As per the interim management plan, "the LB will review the <u>National Bald Eagle Management</u> <u>Guidelines</u> for recommendations related to minimizing disturbance." This document outlines the sensitive stages of breeding season and provides recommendations for buffers for a variety of activities, including hiking and agriculture.

DISTRICT 2

Staff: Peter Guillozet, Kayla Seaforth

Coffelt Farm: Shauna and Jacob assisted with maintenance of riparian plantings. Peter finalized the scope of work for a Lease Rate and Reserve Study for the farm. The Land Bank has approved the use of the forested area (behind the field office) by the Kaleidoscope Forest School through a

revocable license. Peter met with Matthew Steward, a new staff member with SJC Facilities Maintenance to discuss minor building repairs.

Coho: Peter met with Representative Debra Lekanoff and other county staff for a tour of the Preserve and discussed salmon conservation strategies. A tree fell across the deer fencing, and this necessitated removal of the tree and repair of the fence.

Eastsound Waterfront Park: County Parks staff passed on news of a complaint that a commercial kayak company has used the preserve for launching.

Turtleback Mountain: Volunteer monitors pulled weeds! They mostly tackled tansy ragwort and mullein along the trails. Peter advanced planning and plant lists for the Landscape Scale Restoration grant, and as mentioned before, three volunteer work parties were organized around California oatgrass (*Danthonia californica*) collection. Michael Noonan caught some of the activity on film. Native bunch grasses, like the oatgrass, have rebounded in the area that burned this June, however, the recent heat wave caused some mortality among the oak seedlings planted earlier this year (Photo 9-10).

Peter came across a commercial bicycling tour. They had set-up lunch 'camp' in the overflow parking area. He explained that the LB's policy prohibited commercial uses of preserves, and it was well received. The company's owner even sent a follow-up apology. But he addressed it to Craig Canine with the SJPT. This confusion over the ownership of Turtleback led to partnership-building conversations about the Preserve's high use levels and the need to be cautious about its promotion, which also leads to confusion about its ownership. The YCC joined staff and removed old fencing along the boundaries of the recent addition and pull weeds (Photo 11).

DISTRICT 3

Staff: Amanda Wedow

Channel: Trail maintenance was performed and with increase in warmer and drier conditions, prompted the posting of No Fires signs.

FB Spit: There was extremely high public use of the Preserve over the holiday weekend. A neighbor captured the activity in a photo, and also shared his observations that the sand spit is

eroding at a faster rate than past years, likely due to the increase in boat wakes through Fisherman Bay (Photo 1). Amanda also noticed an increase in bicycle use on the trails and has since installed signage at the Preserve's entry. Numerous clean-up projects are underway. A 45foot aluminum ramp, from the old dock, has been sitting in the upper field for several years. Aaron Rock helped to initiate the formal process of 'asset disposal' and he listed the item for public auction. It sold for \$640 and will be removed this month. Later this summer, the final section of dock will be deconstructed. She tagged more creosote logs and other debris for pickup by the Department of Natural Resources (DNR) crew, pulled thistles and mowed the field. Jacob came over to assist.

Hummel Lake: Routine mowing and trail maintenance was performed.

Lopez Hill: A patch of <u>Herb-Robert</u>, a class B noxious weed, was battled.

Spencer Spit: A gate will be installed at the driveway, and staff has been preparing the site for installation.

Tombolo: Staff dug out and pulled up a truck load full of <u>meadow knapweed</u>, a Class B noxious weed that is required to be controlled in SJC. In preparation for the fireworks display, the roadside was mowed. And following the holiday, the debris was cleared with volunteer help from Tim Clark.

Watmough: A mini trail work party was organized. Staff joined BLM employees and a community volunteer to repair a 40-foot section of trail that had sloughed down the hillside. Four trailside hazard trees were also removed. The DNR crew arrived by boat and picked up creosote logs that accumulated over the winter (Photo 12).

Weeks Wetland: Trail work was performed as well as public outreach about non-motorized uses.

Beaverton Marsh Preserve: What's going on in that field

• Wed Jun 23rd, 2021 1:30am sanjuanjournal.com

Submitted by the San Juan County Land Bank.

If you frequent Roche Harbor Road, passing by the San Juan County Land Bank's Beaverton Marsh Preserve, you've probably noticed some different agricultural activities happening in the roadside fields lately. That's because these pastures are transitioning from an annual hay harvest to a seasonal grazing operation. SJI rancher Mike Sundstrom has decided he doesn't need the extra hay anymore, and the Shephard family has been selected for a two-year farm lease for seasonal grazing. The Shephard's will bring in a flock of sheep to rotate through the pastures using portable electric fencing. In preparation, the pastures have been trimmed to extend the grass growing season.

In addition, you may see flagging and odd mowing patterns mid-field. These areas are WSU Extension research plots. Research is focused on soil amendment applications and no-till seeding trials, with the goal of providing useful pasture management information and recommendations to San Juan County farmers and landowners.

During this lease period, the Land Bank intends to develop a Request for Proposals for a longterm farm lease(s). In preparation for doing so, they will be looking closely at the agricultural resources and infrastructure needs, including soils, water resources, fencing, and access. If water resources allow, there is potential for more than one type of farming operation, perhaps a small-scale row crop production or orchard area in combination with grazing and/or haying. If you are interested in learning more about future farmland lease opportunities contact Charlie Behnke at <u>charlieb@sjclandbank.org</u>.

About the San Juan County Land Bank

The San Juan County Land Bank is a local land conservation program, created by voters in 1990, and funded by a 1% real estate excise tax paid by purchasers of property in San Juan County. Through conservation easements or outright purchases, the Land Bank protects special places in the Islands including coastlines, farmland, forests and wetlands. For more information, contact the Land Bank at 360-378-4402 or visit <u>www.sjclandbank.org</u>.

Land Bank partners with local student for community discussion

- Wed Jul 7th, 2021 11:26am sanjuanjournal.com

Discussion participants' opinions help shape the direction around controversial land conservation topics in real-time.

Kaj Litch, a Spring Street International School junior, recently approached the San Juan County Land Bank to collaborate with him on an internship project — a new and innovative way to gauge public opinion by using the digital tool Pol.is. Litch is an intern with Pol.is and has spent the past semester working with Pol.is CEO and co-founder Colin Megill. Using real-time machine learning, Pol.is acquires and interprets input from local participants on a large scale, for the purpose of identifying consensus around controversial questions.

Such a tool fits directly into the Land Bank's next step to improve the organization's conservation programs for and partnerships with our island communities. According to Lincoln Bormann, the Land Bank's Director, "The Commission and the Staff are very excited about the possibilities that Kaj's work can provide.

Director Bormann said, "This spring we completed our Community Conversation Series where we gathered ideas from small groups of residents about the benefits and needs of the Land Bank's programs. Kaj's work will help us engage more of the community and expand these conversations about our part in land conservation. We are asking for and hope many residents will join the effort and inform our understanding of what they want for this area, now and for future generations."

Here's how it works. The discussion will be open to any local resident through the Islands' Sounder website. A series of short statements will be presented where a person can select "agree," "disagree" or "pass/unsure." Participants will also be able to add their own statement about the topic or policy being discussed, on which other users may comment. As comments accumulate and receive votes, Pol.is algorithms will sort participants into clusters and reveal areas of strong consensus. The discussion is now open and available through the Island' Sounder Website and via Facebook. It will run through July. If you have any questions, please email Kaj Litch at <u>kajlitch@gmail.com</u>.

values such as farmland, natural areas, or open space. Easements do not provide public access, unless otherwise noted.

THE LAND BANK STORY

SAN JUAN COUNTY, 1990: Land development and tourism were on the rise, and the County's population was rapidly growing. Facing the loss of places they loved, a diverse group of locals sought for a way to save their treasured open spaces and maintain their quality of life. Their collective vision led to the creation of the San Juan County Citizens Conservation Land Bank.

The Conservation Land Bank is charged with preserving exceptional places in the islands, guided by local input. A one-time 1% real estate excise tax, paid by purchasers of property at closing, funds the program. In this way the community, through the Conservation Land Bank, has the ability to purchase and thereby protect the places that make the islands such a special place to visit, raise a family, retire.

This investment in community space has paid off in spades. Since its inception thirty years ago, the Conservation Land Bank has protected close to 7,700 acres. The portfolio includes some of the archipelago's most celebrated places: Westside Preserve on San Juan, Turtleback Mountain on Orcas and the Fisherman Bay Preserves on Lopez.

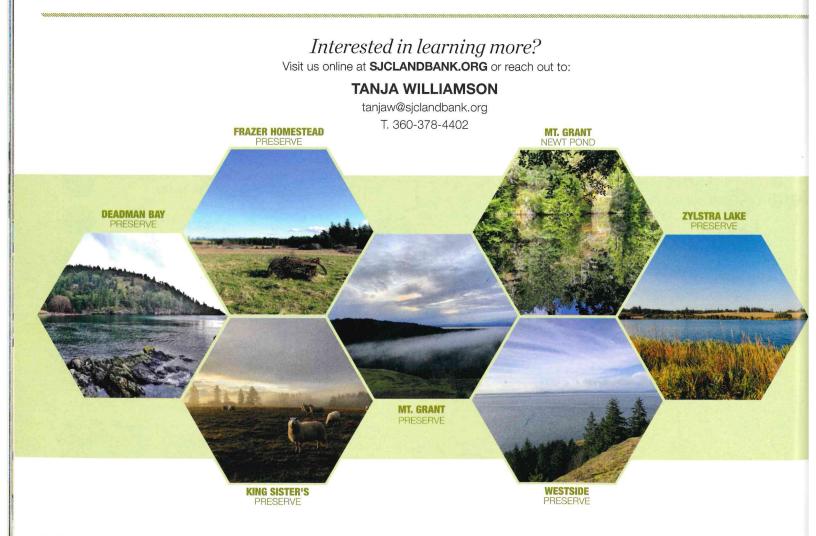

COUNTY

JUAN

SAN

When possible, areas with significant wildlife habitat and community value are purchased and turned into preserves. The Land Bank stewards forests and grasslands, tidelands, 12 different beaches and have designated 50 miles of trails. The Land Bank also manages over 60 conservation easements on private lands. These easements safeguard sweeping views of the sea, family farmlands and waterfowl-rich wetlands.

This is a community that prioritizes open space and strives to provide and protect farms, forests, shores and scenic vistas now and for the generations to come. Welcome!

San Juan Islands Home Prices, Closing Costs Rise

Posted on July 2, 2021 at 5:30 am by Hayley Day sanjuanupdate.com

The Median Islands Income Can't Cover Costs of Median Home Price

By Merri Ann Simonson, Managing Broker, Coldwell Banker San Juan Islands Inc

The cost of construction, selling and buying real estate in the islands has continued to increase based on the requirements to meet the current regulations, overall material and service cost increases.

One could say that it costs more and takes longer to comply with the various regulations that govern the real estate and related construction industries.

Based on the median home price of \$675,000 during the last 12 months, a cash buyer will spend an average of \$13,500 in basic closing costs.

That includes their half of escrow, title insurance for their lender, recording fees, 1% land bank tax, ½% affordable housing tax and home inspection fee. It doesn't include the prorated taxes, insurance, homeowner's dues, loan closing costs or well water testing.

If the buyer needs a loan, they will have monthly payments of \$3,651 based on a \$135,000 or 20% down payment, 3% interest and a 30-year loan. The monthly payment includes principal, interest, taxes and insurance.

The payments would be higher if there are HOA dues or have mortgage insurance if the down payment was less than 20%. Generally, our real estate tax rate is \$8.03 per \$1,000 of assessment.

A buyer would need to make around \$87,642 annually or \$7,300 per month to qualify with a ratio of 50% in order to purchase a \$675,000 home. ($3651 \times 2 = 7301$ monthly income needed $\times 12 = 87,625$ annual income).

This income requirement calculation is only based on the principal, interest, taxes, and insurance and assumes this buyer has no reoccurring debit, such as charge cards, car loans, HOA dues or mortgage insurance.

This is typically not the case. Even if you pay your charge cards in full each month, the underwriters will use a minimum payment amount in the calculation.

The San Juan County Annual Median Income is \$33,216 for an individual and \$63,622 for a household.

Update on Coffelt Farm from the SJC Land Bank

• Tue Jun 15th, 2021 1:30am sanjuanjournal.com

As we enter another phase in planning the future of Coffelt Farm Preserve's agricultural use, the San Juan County Land Bank offers this community update.

The Conservation Ag Resource Team (CART) submitted its final Coffelt Farm report in April to the Land Bank Commission. View the report at <u>sjclandbank.org/wp-</u> <u>content/uploads/2021/04/Coffelt-CART-Report-April-2021.pdf</u>. This was followed by LBC and CART discussions and Q&A sessions at the April and May LBC Meetings. For more information, visit <u>sjclandbank.org/about/agendas-minutes</u>. Although this concludes CART's formal involvement, many members have offered continued support if needed.

Among CART's recommendations is an assessment of existing infrastructure improvement and repair needs and costs by way of a reserve study. This information will be crucial in developing a long-term financial plan for the Preserve and determining how these costs might factor into a long-term farm lease rate. The Land Bank is preparing to work with an agricultural lands appraisal consultant with the goal of having a reserve study and farm lease rate report in hand by September 2021.

Based on the report and other findings the LBC will determine how to proceed with a long-term farm lease or leases. As currently envisioned, this will include the formation of a lease committee and the development of a two-phase Request for Proposals. We expect to release the initial request for Letters of Interest in late Fall 2021 and to follow with invitations for full proposals in early Spring 2022. If an applicant(s) is selected, we will develop and negotiate a lease or leases beginning in January 2023. Based on this timeline, the Land Bank has offered the interim farm lessee, Lum Farm LLC, a lease extension to the end of 2022. This will allow time for the RFP process and any necessary farm operation transitions. Lum Farm LLC has accepted the lease extension and will continue with current production through 2022.

Land Bank staff and commissioners are grateful to CART members for their valuable service throughout this process and to the island community for the thoughtful feedback provided to date. Although lengthy, the ongoing process will help support informed budget planning, ensuring the Land Bank has the information necessary for informed planning and the Preserve continues to provide broad community benefits for years to come. In the meantime, farm operations at the Preserve are continuing smoothly under the interim lease.
